### Goldilocks White Pine

*Pinus parviflora 'Goldilocks'*

Height: 8 feet

Spread: 8 feet

Sunlight: ○ ●

Hardiness Zone: 4

#### Description:

This stunning variety is noted for its long blue green needles which are frosted golden yellow; a naturally artistic sweeping habit makes it perfect as a garden accent; a balance of sun and shade are needed for optimum color

#### Ornamental Features

Goldilocks White Pine has attractive bluish-green foliage edged in gold. The needles are highly ornamental and remain bluish-green throughout the winter. Neither the flowers nor the fruit are ornamentally significant.

#### Landscape Attributes

Goldilocks White Pine is a dense multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Goldilocks White Pine is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

## **Plant Finder**

### **Planting & Growing**

Goldilocks White Pine will grow to be about 8 feet tall at maturity, with a spread of 8 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
